Yatharth Goyal

SDE / BACKEND | JAVA · RELATIONAL SYSTEMS · ASYNC WORKFLOWS

Jaipur, India | yatharthgoyal657@gmail.com
GitHub / LinkedIn / Java DSA / Portfolio source

TECHNICAL SKILLS

Languages Java, JavaScript, Python, SQL

Backend Node.js, Express, PostgreSQL, Redis/BullMQ, FastAPI, REST APIs

Delivery React, Vite, Git, Docker, GitHub Actions, pytest, Playwright

Foundations Data structures and algorithms; 16-topic Java practice roadmap

SELECTED PROJECTS & ENGINEERING CONTRIBUTIONS

AegisED

SYNTHETIC ML · PUBLIC SOURCE

- Built transactional intake and doctor/bed allocation with PostgreSQL row locks; enforced API roles and audit trails across workflow transitions.
- Integrated human-reviewed FastAPI ML support; documented macro-F1 of 0.7893 on 900 held-out synthetic cases, without clinical validation.

EvalForge

PRIVATE · RELEASE PENDING

- Designed durable grading jobs with PostgreSQL persistence, BullMQ workers and idempotent processing; linked rubric scores to exact answer evidence.
- Documented 15/15 backend and 7/7 evaluator local checks; hosted CI and full browser acceptance remain pending.

Grid Flex

LOCAL PROTOTYPE

- Built SciPy/HiGHS energy scheduling with cost, balanced and carbon objectives; independently audited power balance, battery state and deadlines.
- Documented 52/52 local regression tests on synthetic scenarios; AWS SAM templates are prepared, not deployed.

RouteGuard 2.0

IN PROGRESS

- Developing React/Leaflet route comparison with Express, PostGIS and TomTom; auditing YOLO road-damage data and labels.
- Research target: 95%+ precision AND recall per severe-hazard class on independent test data. Target not achieved.

EDUCATION & CERTIFICATIONS

JECRC | B.Tech Information Technology

Expected graduation: 2028 | CGPA: 9.00/10.00
